

Lay-Flat Short Term Potable Water Tank.

The JW Automarine Lay-Flat Flexi-Tainer is approved for short term storage of potable water in extreme environments. Manufactured from a heavy duty PVC coated polyester base cloth, which gives high abrasion and UV resistance, the standard capacity range is from 1,000 to 300,000 Litres. We also provide a bespoke design and manufacture of tanks to suit your requirements. Each tank has various options of inlet and outlet valves. All tanks are fitted with air vents and webbing loop securing straps. Options include a ground sheet. All tanks are manufactured and certificated in accordance with the current EN ISO 9001:2000 quality standard .

Technical Specifications

Advantages

Strong, flexible, versatile and easy to deploy.
 Reinforced construction to ensure reliability.
 Easy to repair.
 Folded compactly for easy storage and transport.
 Excellent resistance to extreme weather conditions, abrasion, corrosion and long term standing use.
 Sizes range from 1,000 Litres to 300,000 Litres.
 Draining is achieved quickly and easily via gravity flow.

Applications

- Emergency water storage
- Potable water storage
- Foam concentrates
- Remote storage
- Chemical waste
- Fertilisers

All of JW Automarine's products are manufactured in accordance with **ISO 9001:2008**
