Flexi-Tainers are a simple and flexible solution for the temporary or long term storage of liquids & fresh water. Ready for instant deployment to safely hold water, chemicals, fuels, pollutants and more. Flexi-Tainers are used in a wide range of environments by the military, famine relief agencies and emergency services as well as industrial and commercial solutions .

Durable, easily handled and with a wipe clean surface, the Flexi-Tainer is fitted with pressure relief valves to prevent overfilling and a 50mm ball valve with quick release couplings for easy connection. Can also be supplied with a wide range of valves and fittings as required. Fabricated from a tough PVC fabric with a load bearing structural polyester scrim coated with PVC for durability & UV resistance, with Radio Frequency welded seams for strength and integrity. Supplied with 2" BSP Butterfly Valve & Repair Kit

Heavy duty and food quality fabrics available, JWA also offers custom design and manufacturing to meet your requirement.

Renowned the world over, JW Automarine has led the way in subsea and surface recovery & deployment airbags since 1972. Manufactured in the UK, our experienced technicians use the highest quality fabrics and materials to produce a product that can be relied upon in the harshest of environments.
